

We are delighted to offer online blended (online and classroom) learning at SANDE. We offer Magnetic Particle Testing Level I & II, Liquid Penetrant Testing Level I & II and Ultrasonic Testing Level I & II. Each of these courses include a free Product Technology module at Level I and II.

Each course will allow a candidate 60 days access to the online system. Once the material has been successfully completed with an assessment mark of 60% then the candidate will be eligible to attend practical classroom training and complete the NDT course at the SANDE facility. If less than 60% is attained then SANDE will offer a consultation to assist the candidate and to ensure that he or she is ready to carry out the practical component and examination. An Instructor will be assigned to each candidate for assistance where required.

Candidates must enrol for the online learning at least 15 days prior to the commencement of the course at SANDE that they choose to complete their qualification. The dates for classroom training and examination will be communicated from SANDE. The online coursework has to be completed before a candidate will be permitted to join the class on the designated date.

As online courses are supplied from an overseas company, if blended learning is chosen as an option SANDE will require the courses to be paid upfront before they will get their log in codes.

For the cost of each online course, please consult our schedule. This is available on our web page or from the school by email.

SANDE courses are all carried out in accordance with SNT-TC-1A and are approved by SAIW to give access to the SAIW ISO 9712 examination directly. These are run at SANDE throughout the year. Candidates may also write at the SAIW campus.

The online blended learning courses have all been approved by ISO 9712 certification bodies locally and internationally.

If more information is required, please email schoolnde@worldonline.co.za or call 011 894 2206.
